305-354-0163 dmore107@fiu.edu [linkedin.com/in/dmor](https://www.linkedin.com/in/dmor) github.com/dmoreno0716

Education

Florida International University

B.A. in Computer Science, Minor in Women and Gender Studies

Miami, Florida

Associations: INIT FIU, Colorstack, SHPE, Breakthrough Tech, Women in Computer Science (WiCS)

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, TypeScript

Frameworks: React, React Native, Node.js, Express, Expo

Databases: PostgreSQL, MongoDB, Firebase

Tools: Git, Prisma, TailwindCSS, Turborepo, JWT

Experience

Meta

May 2025 – August 2025

Software Engineer Intern

New York City, New York

- Redesigned and launched the main landing page of Traffic Config using React and Hack, **accelerating load speed by 30% and improving usability for 220+ internal users**
- Engineered an interactive traffic visualization system that mapped ad flow end-to-end, cutting debugging and monitoring time by **40%** for engineers and analysts
- Partnered with product managers, designers, and backend engineers to integrate visualization features, driving a **25%** increase in tool adoption across the ads organization
- Spearheaded the full development life cycle of traffic visualization, from design to testing, reducing manual reporting tasks by **60%** and streamlining ad traffic analysis

Meta

May 2024 – August 2024

Software Engineer Intern

Menlo Park, California

- Contributed to ProDash, a company-wide employee dashboard serving **80+** engineers, resolving bugs across the codebase to improve reliability and user experience
- Designed and built ClutchTime, a full-stack soccer social platform with a personalized news feed and adaptive content recommendations, using **React, Node.js, and Firebase**

Projects

Selah | *Typescript, React Native, Expo, Node.js, Express, PostgreSQL, Prisma*

January 2026

- Architected and shipped a full-stack mobile app end-to-end using a Turborepo monorepo, structuring 3 shared packages to maximize code reuse across mobile, API, and config layers and accelerating UI development with a custom design system of **10+** reusable components
- Engineered a production-grade **RESTful API** with 20+ endpoints spanning 6 resource domains, hardening security through JWT authentication with access/refresh token rotation and enforcing type-safe request validation with Zod.
- Architected a **PostgreSQL** database with Prisma ORM to manage user accounts, prayer sessions, journal entries, and community groups, supporting features like streak tracking and date-grouped history

ClutchTime | *JavaScript, HTML, CSS, React, Firebase, Node*

August 2024

- Built a full-stack social platform end-to-end using React, Node.js, and Firebase, delivering a personalized news feed and content recommendation engine
- Integrated the openliga.db API to serve real-time data across **10+** leagues, powering a dynamic feed that adapts to each user's followed teams
- Engineered a keyword-based recommendation algorithm that analyzes user engagement to refine article suggestions over time

Leadership

INIT @ FIU

December 2022 – December 2025

Director of Digital Media

Florida International University

- Produced **100+ photos** per event across **100+ annual events**, building a visual archive that supported 3,000+ members and the organization's digital presence.
- Assisted in organizing the largest hackathon in Florida and largest diversity hackathon in the United States with **1500 participants, \$200k in funding, 150 projects, and 60 sponsors.**
